

# HARD DECK™

High Tech  
Floor Coating System

# **HARD DECK™** is easier to wear & chemicals and

AIR-TECH's proprietary epoxy, silicone and polyurethane chemistry ensure HARD DECK will perform on new or old floors in the severe environments of aviation hangars and shops. Proven performance in hangars and shops guarantees success on your floor whether it be an auto dealership, factory, mill, warehouse, laundry or simply a carport or garage. Resistance to chemicals, "hot tire" stains, brake and hydraulic fluids, fuels, salt and abrasion is inherent in the HARD DECK system. HARD DECK coatings are non-yellowing and can also be used outside.

The HARD DECK system employs an epoxy color coat of your choice finished with a super hi-gloss polyurethane. Graphics or lines applied to the color coat are protected by the topcoat. Years hence, if the floor needs renewing one can simply sand the topcoat and apply another coat of clear HARD DECK polyurethane.

**This yields a like new floor!!**

Hanger, Shop or Showroom

# er to use, more resistant d looks better longer!

## Hard Deck Advantages

- MAXIMUM CHEMICAL RESISTANCE
- CERAMIC-LIKE WEAR RESISTANCE
- USE ON NEW OR OLD FLOORS
- CONCRETE OR ASPHALT
- EASY TO APPLY
- REASONABLE COST
- COMPLETE SYSTEM INCLUDES CLEANERS, PREPARATION AND COATING MATERIALS
- HI GLOSS SHOWROOM LOOK
- WIDE COLOR SELECTION
- NON-SKID OPTION FOR ANY COLOR CHOICE
- INDOOR OR OUTDOOR USE – RESISTS ULTRAVIOLET LIGHT
- PROTECTED GRAPHICS OR LINES
- MAXIMUM ADHESION
- ENVIRONMENTALLY FRIENDLY FORMULAS
- TECHNICAL SUPPORT

TEXTURED NON-SKID FINISH

AIR-TECH'S philosophy with all its products is to offer only the best; then to guide and assist our customers throughout their application to a successful result.

**Satisfied users are our sales force!!**

## OTHER AIR-TECH PRODUCTS FOR AVIATION

### FABRIC COVERING SYSTEMS:

**AIR-TECH'S** polyurethane fabric covering system is without equal in the field of fabric covered aircraft. It has been proven in the most severe environments, on spray planes all over the world, and on high performance airshow aircraft. **AIR-TECH'S** system is approved by the FAA for well over 500 aircraft models and all materials are manufactured under a strict FAA Parts Manufacturer Approval (PMA) system.

### PAINT

**AIR-TECH'S** flexible "wet-look" polyurethane paints are designed specifically for aircraft surfaces whether fabric, metal or composite. With no brittle resins they last under flexing and continuous outdoor exposure. **AIR-TECH** will mix any color to order.
